Dear students and staff/faculty,

I am writing today to share with you that while we have watched the positive cases of COVID-19 continue to climb in West Michigan, our student and staff positive COVID-19 numbers reflect some of the same trends.

We are learning of some commuting students, student athletes and coaches of a few of our athletic teams who have tested positive for COVID-19 or are awaiting test results. We have taken measures to ensure students who do not have symptoms will stay healthy and safe which include methods of quarantining, halting practices and games and having students take classes virtually.

With this news, we want to continue to encourage you to be safe. Creating safety for self will have ripple effects of building safety around our entire campus. The responsibility is within each one of us. Keeping 6 foot distance, wearing masks inside and outside when not distant while always using good hand hygiene will be important as we fight back against this pandemic.

Leadership teams on campus are currently building plans to prevent further cases of positive COVID-19 results within our community. **Attached, you will find an information sheet that will walk each student and staff member through the process of COVID-19 built on best practices to ensure we continue to build safety on and off of our campus.**

May God bless you and grant you peace during this uncomfortable time. We can beat this together! Please contact me if you have any questions.
