

6/1/2021

Dear Grace Family,

As we reflect on the past year we have much to be thankful for as an institution of higher education. Covid-19 created major hurdles for all of us. While we recognize that there were struggles endured by students, staff and faculty we also believe that this time of diligent, hard work also sharpened us and made us a better university.

Grace Christian University is thankful for the work each one of you have contributed to create safety and health on our campus. We are seeing a trajectory of forward movement as it pertains to the coronavirus landscape.

You may have seen news reports of some colleges and universities requiring COVID vaccination for students who elect to live on campus while other universities are requiring COVID vaccination for students to attend in-person classes. We know a lot can change between now and the beginning of the fall semester. However, at this time, Grace does not anticipate a COVID vaccination requirement for our campus.

As more people become vaccinated, the CDC and the state health department are willing to open up services and opportunities for normalcy. If getting the vaccine aligns with your convictions, we encourage our students, staff and faculty to get the vaccine to help our campus build immunity that would allow us to have the least amount of health hurdles and service related hurdles in the fall. Our trust is in the Lord and our prayer is for a strong and healthy community in 2021.

We will continue to share information with you as it pertains to health and wellness. We look forward to seeing you all in the fall as we start up our Fall 2021 semester, the best semester yet!

In Him,
